

EMERGENCY DOCTOR CALLING BUTTON

OVERVIEW

Ishan Systems World Wireless Doctor Calling System:

Product Description:

Elevate the standard of patient care with the Ishan Systems World Wireless Doctor Calling Button. Designed to streamline instant communication between patients and healthcare providers, this cutting-edge device ensures prompt and efficient medical attention in any healthcare setting.

key features

Instant Communication: With just the press of a button, patients can immediately alert medical staff, ensuring rapid response times during emergencies or routine care needs.

Wireless Technology: The device operates on a robust wireless network, eliminating the need for complex wiring and allowing easy installation and flexibility in placement.

User-Friendly Interface: The calling system features a simple, intuitive interface that is easy for patients of all ages to use, including those with limited mobility or technical skills.

Portable and Compact: Its sleek, lightweight design makes it easy to carry or position anywhere within the healthcare facility, from patient rooms to common areas.

Customizable Alerts: Medical staff can receive notifications through various channels, such as pagers, smartphones, or central monitoring systems, tailored to the specific needs of the healthcare facility.

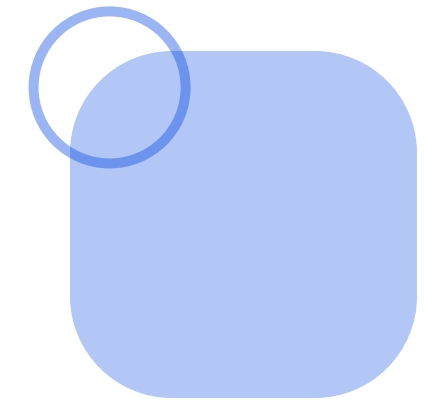

Durable and Reliable: Built with high-quality materials, the device is designed to withstand the rigorous demands of a healthcare environment, ensuring long-lasting performance and reliability.

Enhanced Patient Safety: By providing a direct line of communication between patients and medical staff doctors, the wireless calling button enhances patient safety and peace of mind, fostering a more secure and responsive care environment.

APPLICATIONS

01

- **Hospitals:** Improve response times and patient satisfaction with seamless communication between patients and healthcare providers.

02

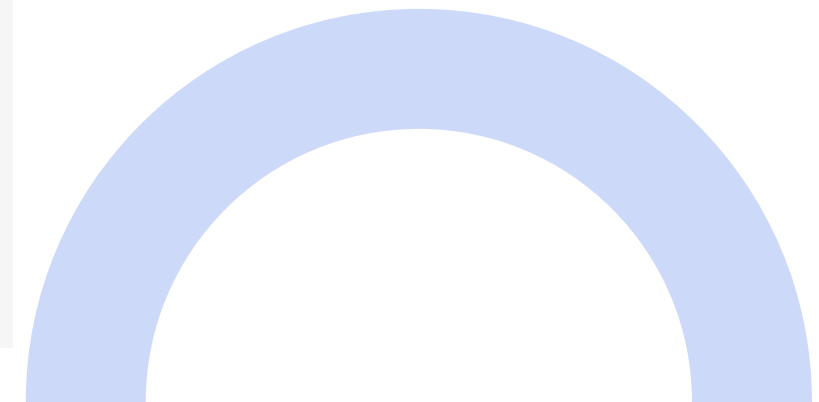

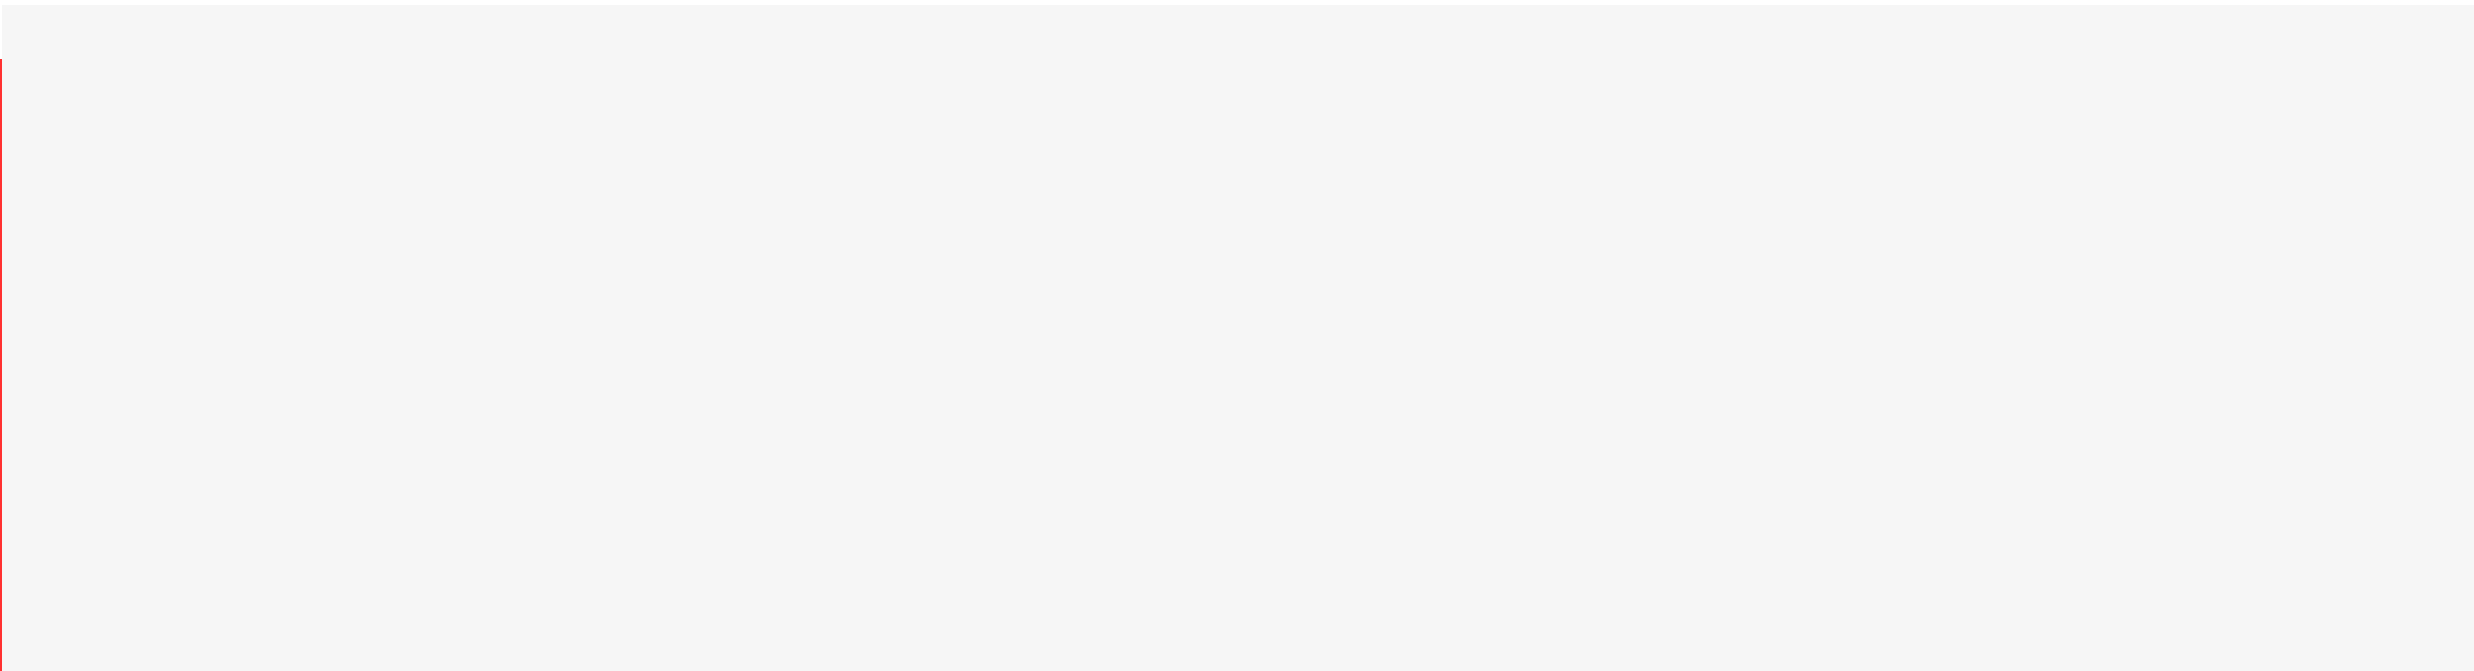

- **Nursing Homes:** Ensure elderly residents receive immediate attention, enhancing their comfort and safety.

03

- **Clinics and Medical Centers:** Streamline operations and boost efficiency with quick and reliable communication tools.

04

- **Emergency Rooms:** Facilitate rapid responses to critical situations, ensuring timely medical intervention.
